Correct identification will avoid any inadvertent intake of such foods by this risk group. The special permanent label is to identify the allergen on Araven's airtight container, preserving food with every guarantee for customers who suffer food allergies or intolerances.

## Ingredient Bins

Ingredient bins are designed for perfect storage, optimum food preservation with maximum hygiene and the strictest control of raw materials. Ingredient bins are ideal for storing food with very low levels of humidity (dry goods, nuts, pasta, rice...) as they can be closed so the contents are protected without having to be airtight, avoiding the humidity getting in and spoiling the contents. All you have to do then is to find a suitable place to store the container, which should be a dry and well-ventilated location, away from sources of heat and moisture, isolated from very damp environments.

Available in two sizes: 50ltr & 80ltr.

# Allergen Info Labels

These labels are removable and perfect for complying with new allergen labelling regulations.
